ALFA ROMEO 4C

4C 2013-

ART. NR.: ARS GQ00

OHLINS Advanced Trackday & Motorsport product range with separate rebound and compression damping adjustment is the ultimate choice for trackdays and everyday life.

The incredibly light and powerful Alfa Romeo 4C is as much roadster as a modern car can be. Already in series production a very handy and agile vehicle, the Alfa 4C benefits from the specially developed shock absorbers based on our proven Monotube design and improve agility significantly. Separately adjustable rebound and compression damping with the spring preload adjustment offers an incredible variety of ways to customize the Alfa. Match the needs of its driver.
